### FD2 CIVIC High Power Muffler System

**WITHOUT COMPROMISE**

#### FD2 High Power Muffler System

The forth muffler to be released under the same 'without compromise' concept.

After receiving countless requests about which muffler is best, when used in conjunction with Toda Racing parts in producing the most power, and having looked at what is available we decided to design our own stainless steel system. Straight titanium end pipe.

Blue heat treatment giving a hard worked racing image.

With the end receiving special treatment to prevent cracking.

The internal design is based around a constant  $\phi 60$  pipe, with no bends or restrictions the engine is able to breath more freely so releasing more power.

(Stainless) Center pipe  $\phi 60$  mm + (Titanium) Tail pipe  $\phi 100$  mm

FD2 CIVIC High Power Muffler System 18000-FD2-00L 95,000yen.

Shipping costs reduced due to compact 3 piece design.

As for muffler sound volume : 94dB JVIA tested.
