Big Single Throttle Body

“TODA Big Single Throttle Body / Euro-R (CL7)” newly added to the line up joining the Integra-R and Civic-R (DC5/EP3) as well as the S2000 (AP1).

Increasing the diameter of the throttle and in combination with a tapered entrance helps to increase the amount of air the engine can breathe, giving improved performance.

Dimensions are 64mm up from 62mm for the valve diameter and the tapered entrance starting at a diameter of 70mm for all K20A's. The AP1 has the same entrance diameter but the valve diameter is increased from 62mm to 65mm.

All throttles are new and include map sensor, throttle position sensor and minor parts. No trade-in is required so you get more performance and a new throttle assembly.
