BALANCER SHAFT KILLER BAFFLE PLATE for CL7 (option)
11200-K20-LB1 5,000yen

Balancer Shaft Killer KIT for CL7 ACCORD Euro-R K20A 42,000yen 15100-K20-000

The CL7 Accord uses a balancer shaft and integrated oil pump system. Although useful for characterizing the Accord's street driving style it does cause frictional losses of approx 5HP. For competition orientated cars we have developed the Balancer Shaft Killer kit that replacing this system for improved performance.

Feature

- Regain 5 H.P (about) and reduces the engine weight by 4kg.
- Can be installed without any modification on the engine block.
- As for customers using TODA anti G force oil pan, Please purchase the optional TODA oil baffle plate for balancer shaft killers (11200-K20-LB1) separately to maintain the performance of "Anti G force".
- Oil pump relief pressure is more highly set up from standard specification for bearing protection at the time of delivery (about 10% -15% up).
