4AG Heavy Duty Oil Pump for AE92 latter model & 20 valve engine

4AG heavy duty oil pump for the late model AE92 and 20 valve engines

Late model 4AG 16 valve and 20 valve Heavy duty Oil Pump 15131-4AG-200 List Price 29,000yen

* Outer diameter of pump Φ 74mm

- These heavy duty oil pump gears are designed to replace the oil pump gears found in later model 4AG AE92 (16V), and 4AG 20 valve engines found in the AE101 (Silver head cover) and the AE111 (Black head cover).
- Made from high spec material and machined by CNC, to give you improved high-revolution reliability. Standard oil pumps are made from sintered alloy, this is fine for standard use, but reliability is questionable in high performance application. (Pump capacity is the same as the standard)
