

## What's new !!

## FA20 High Power Profile Camshaft &amp; Up-rated Valve Spring

## FA20

FA20  
High power profile camshaft  
IN 60,000yen x2 / EX 60,000yen x2

## FA20 Camshaft Specification (1set)

Part No.	Angle	Cam lift	Price
14111-FA2-R0A	266IN	12.5	¥60,000
14211-FA2-L0A	266IN	12.5	¥60,000
14121-FA2-R0A	260EX	12.2	¥60,000
14221-FA2-L0A	260EX	12.2	¥60,000

FA20  
Up-rated Valve Spring set  
¥55,000

■ Up rated valve spring + Spring retainer/ Spring seat

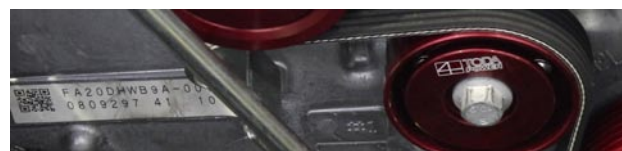

● Single stock springs replaced with double progressive pitch springs.  
Also included in the set are dedicated designed retainers and spring seats.  
Can be used with up to 12.5mm of lift.

Note: Toda cams are designed with early model rocker arms. Later model rocker arms are different, earlier rocker arm highlighted.

Visually the later model rocker arms have a round mark on the top of the pivot point.

Below is an early engine code number reference plate.

These cams have been developed to make the FA20 engine rev higher.

Exploiting higher valve lifts has meant the need for TODA up rated valve springs to be used with these cams.

Camshaft dowel pins have been adjusted to give same overlap clearance as stock to keep stock piston to valve clearances, when used with stock ECU.

To get the most out of this FA20 High Power Camshaft, rewritable ECU along with confirming valve to piston clearance is recommended.
