**Description**

TOYOTA 86 / SUBARU BRZ DA type damper designed for comfortable street performance.

As well as the DA-G type designed for mini circuits (Japanese Gymkhana competition), giving a harder ride and is mainly orientated to circuit use.

This flexibility has been achieved; from its hardest setting giving the driver direct feeling, alert and agile sporty drive to its softest setting of a graceful and comfortable cruise.

Re-designed rear dampers with the main body now being made from high durability aluminum greatly reduces the weight of the unit, along with a new design of piston help to improve and give a smoother operation. Give it a try.
